

Wir arbeiten gerne bei Monster

Weil uns das Arbeiten in einem spannenden Umfeld monstertmäßig Spaß macht.

Trovix, a Monster company, provides intelligent search that matches jobs and candidates. The Trovix Knowledge Base (KB) is an ontology whose objects and associated categories form the backbone of our intelligent search engine.

➤ Knowledge Engineer (m/f) Location Mountain View, CA (USA)

We are seeking a talented Knowledge Engineer who is fluent in German to help us expand and refine our Knowledge Base for innovative Monster search products. If you are interested in natural language and are trained in linguistics or related field, if you like to find and organize new information, and are interested in learning more about the wide range of jobs that exist in the world, then this might be the job for you.

Essential functions:

The ideal candidate will successfully enhance, test, and maintain the Knowledge Base, and assist with other areas of the development process, specifically:

- Proactively identify and develop concepts and terms for new industries or functional areas based on:
 - Data from in-house text analysis tools
 - Supporting research of secondary source materials
 - Consultation with Subject Matter Experts
- Refine and improve existing definitions in the Knowledge Base
- Contribute to job and resume test suites
- Troubleshoot, verify, document, and fix reported matching problems and requests
- Maintain accurate, current records in our bug tracking system and documentation archives

Qualifications:

- Minimum BA/BS and well-rounded education
- Must be fluent in German, preferably a native speaker
- Familiarity with linguistics, natural language processing, text retrieval, information sciences, or formal logic
- Relevant skills and experience:
 - Experience building or working with taxonomies or ontologies highly desirable
 - Strong language skills, especially excellent understanding of German syntax, morphology, orthography, and discourse patterns
 - Familiarity with the job marketplace in Germany
 - Ability and interest in understanding, analyzing and organizing information in fields outside your current areas of expertise
 - Independent research experience
 - Strong logical, analytical abilities with a high level of common sense
 - Very well organized, with excellent follow-through
 - Self-motivated, energetic, good attention to detail, fast learner
 - Commitment to meeting deadlines
 - Some programming experience and use of scripting tools

If you feel the above mentioned tasks and qualifications suit your interests we will be happy to receive your application!
